## National Science Foundation News

**NSF'S [Improving Undergraduate STEM Education: Hispanic-Serving Institutions \(HSI\) Program \(22-545\)](#) revised solicitation is now available. This program is offered by the Directorate for Education and Human Resources: Division of Human Resource Development and Division of Undergraduate Education.**

**Some key information from the HSI Program [solicitation](#):**

The goals of the HSI program are to enhance the quality of undergraduate science, technology, engineering, and mathematics (STEM) education and to increase the recruitment, retention, and graduation rates of students pursuing associate's or baccalaureate degrees in STEM. Achieving these, given the diverse nature and context of the HSIs, requires additional strategies that support building capacity at HSIs through innovative approaches: to incentivize institutional and community transformation; and to promote fundamental research (i) on engaged student learning, (ii) about what it takes to diversify and increase participation in STEM effectively, and (iii) that improves our understanding of how to build institutional capacity at HSIs. Intended outcomes of the HSI Program include broadening participation of students that are historically underrepresented in STEM and expanding students' pathways to continued STEM education and integration into the STEM workforce.
